Aprima 2017 User Conference CME Information

Statement of Purpose

Physicians and their office staff must handle many demands every day, including delivering excellent patient care, running a business, complying with government mandates and incentive programs and maintaining and protecting their business across social media. These various demands are not always easy to satisfy, and physicians and their office staff are searching for ways to evaluate and chart patient visits swiftly and easily, understand their business, while adhering to government programs, all while protecting their patient data and growing and maintaining their reputation on social media.

This CME/CE activity will discuss how healthcare professionals can apply best practices using Aprima Electronic Health Record software for both patient documentation and billing. This activity will also provide information on government mandates such as HIPAA and incentive programs such as MIPS/MACRA. It will explore the methods of protecting the practice from cyber-threats, and also provide information on how to enhance their business and protect their on-line reputation in the social media arena.

Learning Objectives

At the conclusion of this conference, participants should be able to:

1. Apply best practices to efficiently document a patient encounter
2. Discuss how your practice can enhance the patient experience by using EHR tools for referrals, messages and patient orders.
3. Implement best practices in managing the practice revenue cycle to ensure quality patient care and maximized revenue collection.
4. Summarize the two tracks available to providers under MACRA and how the use of an EHR can fulfill the various reporting criteria to maximize revenue and avoid penalties.
5. Discuss the online/social media perception of your practice to ensure a fair representation.

Target Audience

This program is designed for clinicians including physicians, physician extenders, office managers, billers, coders and other medical office personnel involved in the day-to-day use and of an electronic health record system.

Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint providership of Antidote Education Company and Aprima Medical Software, Inc. Antidote is accredited by the ACCME to provide continuing medical education for physicians.

Antidote Education Company designates this live activity for a maximum of 9.0 *AMA Category 1 Credits™*. Physicians should only claim credit commensurate with the extent of their participation in the activity.
