

FOR IMMEDIATE RELEASE

Aprima Customers Given Quality Improvement Award by Arizona Health Leaders

Dallas, TX (June 5, 2014) – Aprima Medical Software announced today that two of their customers – [Life Care for Women](#) and [Arizona Grand Medical Center](#) – have earned the [2014 Arizona Quality Improvement Recognition Award](#).

Life Care for Women is an OB-GYN practice in Gilbert, Arizona and Arizona Grand Medical Center is a senior living community in Phoenix.

A total of 43 practices were honored with the award. Both Life Care for Women and Arizona Grand Medical Center demonstrated that they are on track to meet the 2017 National Quality Strategy goals for data collection, measurement, and public reporting. This important work supports quality-performance measurement and strengthens the health improvement efforts of public- and private-sector stakeholders at the community level.

In a recent press release, Mary Ellen Dalton, PhD, MBA, RN, HSAG president and CEO said “This award symbolizes the dedication and accomplishments demonstrated by practices that use health information technology to manage patients with complex chronic diseases, report quality performance measures, and in so doing, advance the overall health of their patients. These physician practices are leaders in their communities and are instrumental in helping Arizona meet the Affordable Care Act’s National Quality Strategy goals to provide better care and improve the health of communities at an affordable cost.”

“Needless to say, Aprima is very proud to have such prestigious customers. We greatly admire their pursuit of excellence and are thrilled to see their accomplishments be recognized with this important award,” said Michael Nissenbaum, Aprima president and CEO.

Award recipients were honored at a special award ceremony on April 10 in Scottsdale, Arizona.
