APRIMA FOR INTERNAL MEDICINE PRACTICES

With Aprima EHR/PM solutions, you'll enjoy improvements in quality of care, patient satisfaction, quality of life and bottom line.

Aprima offers Internal Medicine practices powerful solutions to boost productivity and efficiency. Thousands of Internists in practices across the nation use Aprima.

Here’s how Aprima can help your practice:

Create more time in your day without losing productivity by leveraging the speed and efficiency of Aprima EHR

Providers tell us we are saving them valuable time with every patient visit, compared to other systems they have used.

Lightning speed documentation of patient visits

- Document multi-problem complex patients very quickly
- Many follow-up visits are documented in less than a minute

The tools you need to help increase patient satisfaction and your practice’s income:

Annual Medicare Wellness Exam

Aprima EHR helps you easily document and bill for initial and subsequent Annual Medicare Wellness visits. Additionally, Aprima EHR provides physicians with an automated alert to tell providers when a patient is due for the next exam. Advance Care Planning

Documentation for patient’s decisions regarding life-sustaining treatment is stored in a single location in Aprima EHR, so you don’t have to search to find the advanced directives. Medical orders for life-sustaining treatment are at your fingertips. You’ll also instantly know whether decisions were made by the patient or someone on the patient’s behalf.

Physician Quality Reporting System (PQRS)

Aprima makes it easy for your practice to track and report quality measures, helping you demonstrate that you meet the PQRS criteria. With Aprima, you’ll be able to quickly and accurately document aspects of care such as prevention, chronic- and acute-care management, procedure-related care, resource utilization and care coordination. At the end of the year, you’ll be able to easily aggregate your data and report your clinical quality measures to avoid penalization.
Chronic Care Management and Care Plan Oversight

Medicare’s Chronic Care Management (CCM) program allows providers to bill for time they spend on non-face-to-face care coordination services for Medicare patients who have two or more chronic conditions, such as diabetes, hypertension, COPD and heart disease. Additionally, Medicare’s Care Plan Oversight (CPO) allows a provider to bill for supervision of a patient who is receiving complex and/or multidisciplinary care provided by a participating home health agency or Medicare-approved hospice.

Aprima’s CCM and CPO modules help physicians track their time and ensure they receive proper reimbursement.

Patient Centered Medical Home (PCMH)

Our integrated EHR/PM solution helps practices to achieve NCQA PCMH recognition. Aprima’s all-in-one solution integrates patient care and advanced EHR technology, including referral tracking, data-driven diagnosis, patient reminders for preventive care, e-prescribing and performance reporting.

Aprima 2016 is prevalidated by NCQA to receive 28.24 autocredit points for 60 factors toward NCQA’s PCMH 2014 scoring. Aprima PRM 2016 also received a supporting designation for 82 additional factors in the PCMH 2014 Standards. This means practices are automatically given credit for several areas in the PCMH application process and do not have to submit documentation for the prevalidated factors.

e-Prescribing of Controlled Substances (EPCS)

Get a secure way to transmit your patients’ prescriptions with Aprima’s electronic prescribing of controlled substances. This streamlines your practice’s workload with electronic refill requests, automatic medical history retrieval and eligibility information.

Patient Portal

Aprima’s secure portal empowers patients with 24x7 self-service access to their medical records and physician office. One of the many uses practices find beneficial is posting new patient forms online, so patients can submit information before arriving for that first visit. Patients are also able to retrieve patient education materials and review/pay their bill online.

With Aprima EHR/PM solutions, you’ll enjoy improvements in quality of care, patient satisfaction, quality of life and bottom line.

We’ve grown so much in the past several years. If we weren’t using Aprima, this growth would have been much less efficient and far more challenging for us. With Aprima, I’m done with the patient note before the patient gets to the front desk.

– Marc Mayer, DO
Avenel-Iselin Medical Group

Patients appreciate being able to interact with the Aprima system. I show them the screen as we’re reviewing histories, medications and visuals like a graph of a diabetic patient’s A1C levels.

– Gervacio Diaz, MD
Internal Medicine Practice Owner

Switching to Aprima is helping us guarantee the long-term success and health of our practice.

– Christopher Hiler, MD
Desert Bloom Family Medicine

ABOUT APRIMA
MEDICAL SOFTWARE, INC.

Aprima provides innovative electronic health record, practice management, population health and revenue cycle management solutions for medical practices and has been named the 2018 Best in KLAS in the Small Practice Ambulatory EMR/PM Category (1-10 physicians).

Aprima serves physicians in primary care and more than 70 specialties with a fast, flexible design that adapts automatically to a physician’s workflow and sets the benchmark for ease-of-use, speed and flexibility, and is one of the few companies with a 20-year track record of success, including a long history of meeting each and every government certification since its inception. Based in Richardson, Texas, the company performs all development, support and implementation from within the U.S.
